Did you know that a giant water bug can kill a frog or a fish twice its size? Dive into **BIG BUGS to SeeMore....if you dare!** "Kids can learn to count from one to ten with the help of a big-eyed caterpillar, praying mantis, and other 'googly eyed' insects in this fun book."--

Cover back. A trip to a farm is always fun for little ones. From cows going "moo," "moo," "moo," to ducks going "quack," "quack," "quack," young learners will discover the sounds that different farm animals make. This delightfully-illustrated book includes, cows, chickens, horses, ducks, pigs, and sheep. It's an animal symphony of special sounds. Learn simple Spanish words and phrases with the corresponding version *Mira a los animales*. Buzz around with Bees! This title covers everything from what bees look like to what they like to eat. Complete with a More Facts section, bolded glossary terms, and diagrams pointing out specific body parts. Young readers will gather basic information about bees through easy-to-read, simple text alongside stunning full-bleed photographs. Aligned to Common Core standards and correlated to state standards. Abdo Kids is a division of ABDO. Visitors to tropical forests generally come to see the birds, mammals, and plants. Aside from butterflies, however, insects usually do not make it on the list of things to see. This is a shame. Insects are everywhere, they are often as beautiful as the showiest of birds, and they have a fascinating natural history. With their beautifully illustrated guide to insects and other arthropods, Paul E. Hanson and Kenji Nishida put the focus on readily observable insects that one encounters while strolling through a tropical forest in the Americas. It is a general belief that insects in the tropics are larger and more colorful than insects in temperate regions, but this simply reflects a greater diversity of nearly all types of insects in the tropics. On a single rainforest tree, for example, you will find more species of ant than in all of England. Though written for those who have no prior knowledge of insects, this book should also prove useful to those who study them. In addition to descriptions of the principal insect families, the reader will find a wealth of biological information that serves as an introduction to the natural history of insects and related classes. Sidebars on insect behavior and ecological factors enhance the descriptive accounts. Kenji Nishida's stunning photographs—many of which show insects in action in their natural settings—add appeal to every page. A final chapter provides a glimpse into the intriguing world of spiders, scorpions, crabs, and other arthropods. Beautiful, simply written observations about the beetle, cicada, praying mantis, glow-worm, wasp, grub, cricket, locust and other creatures, describing how they hunt, build nests, feed families, and more. This edition of *The Popol Vuh* is the first English translation of the mythic Guatemalan work, which consists of mythical historical narratives and translates roughly as "Book of the Community." The main segments of *The Popol Vuh* consist of creation myths and

stories of twin heroes Hunahpu and Xbalanque and their genealogies. The translation includes notes about the work from Lewis Spence, as well as an introduction. LEWIS SPENCE (1874-1955) was a Scottish journalist who recorded Scottish folklore, myths and legends from around the world, histories and legends about the lost world of Atlantis, and works on the occult. Spence graduated from Edinburgh University and was the editor of three magazines, The Scotsman, The Edinburgh Magazine, and The British Weekly. He also founded the Scottish National Movement, now known as the Scottish National Party. Watch our happy, helpful friend the Honey Bee, always so busy and buzzy and find out why bees and flowers are such good friends. Illustrations using vivid colours include many real flower species which children may recognise from their garden or have seen growing in the wild, 3 of them are named at the end of the book too. The narrator shows us what these fascinating bugs have been getting up to in her garden. What we can learn: concepts: Simple ideas about the life of a bee Bees are insects Some common flowers: Daisy, Poppy, Sunflower new words: Insect, Pollen, Nectar, Hive, Honeycomb, Blossoms PAGES: 26 WORDS: 262 LEVEL: Preschool to 6yrs Other books in the series: Meet Bacteria! Travelling Seeds MUMMY NATURE series – nurturing children's curiosity Each book in the series is one mini nature lesson wrapped up in colour and rhyme. These books are intended for very young children including toddlers and will give them just a glimpse into some of the wonders of the natural world. Illustrated for maximum vibrancy and visual impact, using rhyme to engage young minds and encourage participation. Read the rhymes to your children and soon they will be reading them to you! The narrator is a small child and keen observer who tells us in short rhyming phrases everything she thinks we should know, and all about the magical things she sees around her. Sometimes she is camouflaged in the long grass and other times she has to climb a tree to get a better look. tags: free kids books, free childrens books, books for kids, books for children, free educational books, stories for kids, early reader, children's stories, bedtime stories, kids ebooks, kids book about animals, beginning reader, free ebooks, preschool, ages 3-5, ages 6-8, childrens books ages 4-8, childrens nature books, kids nature, free animal books for kids, free childrens books ages 2-4, childrens free epub, kids box set, childrens non-fiction I See Ants introduces emergent readers to ants while providing them with a supportive first nonfiction reading experience. challenges at once. Pedro is back for another adventure with his pal Katie Woo. One day, he's pretending he's a pirate, sailing the high seas. The next day, he's practicing his karate, being as fierce as a ninja star. But no matter what adventure Pedro's having, he's always Pedro the Great! Full color. "Each title in the Everything About Bugs series explores an insect, arachnid, or other invertebrate. Readers will learn about how an animal looks, behaves, and finds food"-- Enter the kingdom of bugs and their close relatives for a magical journey through the forest floor, down into the deepest caves, and even across the open ocean. Insects, arachnids, worms, and molluscs are crawling across the pages of this colourful bug book, which combines gorgeous illustrations and photos to help young animal enthusiasts spot and learn all the main bug groups. From dancing bees to cartwheeling spiders, from butterfly athletes to the beetles that eat poo, they'll learn all about the incredible secret world of creepy-crawlies. And they'll find out how bugs help to look after our planet too. The Book of Brilliant Bugs, written by insect expert Jess French and illustrated by Claire McElfattrick, takes children on a fascinating journey of exploration, showing them just how amazing creepy-crawlies are, what they do for our planet, and how we can help them. It includes bug relatives such as slimy slugs, web-spinning spiders and scuttling centipedes, plus amazing facts on how bugs pass on messages, compete for food, seek true love, and fill the air with buzzing wings. The Bug Squad is back in a story about playing together, problem solving, and saying you're sorry in this hardcover picture book from the New York Times bestselling Ladybug Girl series. This book was a Jumpstart Read for the Record Book. The Bug Squad – Bumblebee Boy, Dragonfly Girl, and Butterfly Girl – are coming to Lulu's house for a play date and she know exactly what they are going to do all day. They use their big imaginations to create their own fun games right in Lulu's backyard. But when some things don't go just the way Lulu planned, Dragonfly Girl's feelings get hurt. This is a job for Ladybug Girl! When Lulu is Ladybug Girl, she knows that even if it isn't easy, it is important to apologize. For fans of Fancy Nancy and Betty Bunny, the Ladybug Girl series honors individuality, friendship, and a love of nature! This touching story about a young boy coping with his grandfather's disability has long been one of Tomie dePaola's most popular picture books. Now, for the first time, it is available in a larger format, full-color edition—perfect for family sharing. Readers of all ages will love to watch Grandpa Bob teach Bobby to walk, and how Bobby returns the favor when Bob has a stroke, all in beautifully rich full color. The Life Cycle of a Frog details the fascinating changes in a

frog through its four stages: egg, tadpole, froglet, and adult. Amazing illustrations and photos help explain how metamorphosis differs in various climates and how pollution and pesticides affect frogs. A nonsensical and factual look at animals. Buzz around with Mosquitoes! This title covers everything from what mosquitoes look like to what they like to eat. Complete with a More Facts section, bolded glossary terms, and diagrams pointing out specific body parts. Young readers will gather basic information about mosquitoes through easy-to-read, simple text alongside stunning full-bleed photographs. Aligned to Common Core Standards and correlated to state standards. Pedro collects a lot of different bugs for a class assignment, but when his brother lets them out in the house their parents are furious, and ban any further collecting. In This Emergent Reader, Kids Hear Funny Noises At A Sleep Over. Teaching Focus, Words To Know Before You Read, Comprehension And Extension Activities. Inside Front And Back Cover Parent And Teacher Support. Audisee® eBooks with Audio combine professional narration and text highlighting for an engaging read aloud experience! What do a bee, a butterfly, and an ant have in common? They're all insects! But do you know what makes an insect an insect? Read this book to find out! Learn all about reptiles, fish, mammals, and other animal groups in the Meet the Animal Groups series - part of the Lightning Bolt Books™ collection. With high-energy designs, exciting photos, and fun text, Lightning Bolt Books™ bring nonfiction topics to life! Amalia deals with loss while learning about love and her cultural heritage in this tender tale from acclaimed authors Alma Flor Ada and Gabriel M. Zubizarreta. Amalia's best friend Martha is moving away, and Amalia is feeling sad and angry. And yet, even when life seems unfair, the loving, wise words of Amalia's abuelita have a way of making everything a little bit brighter. Amalia finds great comfort in times shared with her grandmother: cooking, listening to stories and music, learning, and looking through her treasured box of family cards. But when another loss racks Amalia's life, nothing makes sense anymore. In her sorrow, will Amalia realize just how special she is, even when the ones she loves are no longer near? From leading voices in Hispanic literature, this thoughtful and touching depiction of one girl's transition through loss and love is available in both English and Spanish. Bugs can build structures that are as complex as the ones that we build! Readers will learn about the amazing things tiny creatures such as silkworms and beetles can build in this inviting nonfiction title that has been translated into Spanish and features detailed photos, riveting facts, informational text, a glossary for vocabulary improvement, and

a list of useful websites. Describes a caterpillar's four stages of life. Pedro collects a lot of different bugs for a class assignment, but when his brother lets them out in the house their parents are furious, and ban any further collecting. From the creators of the New York Times bestselling Ladybug Girl series comes a story about sibling cooperation and play featuring a member of the Bug Squad, Bumblebee Boy! When Sam is Bumblebee Boy, he likes to fly alone, using his imagination to battle dragons, pirates, and tigers. Sam's little brother, Owen, would like to play with him, but Owen doesn't have a cape or a mask, and Bumblebee Boy doesn't need his help. But when more aliens than Bumblebee Boy can handle land on the moon, will he be able to defeat them by himself? Through their imaginary adventures, Sam and Owen discover just how much fun a brother can be, and learn that there are times to play alone and times to play with others. Uses text, illustrations, and activities to present all sorts of information about insects and spiders. This series brings insects and spiders to life, with up-to-date information and state-of-the-art 3D illustrations that practically leap off every page, stimulating minds and imaginations in a whole new way. Discover the variety of bug-eaters—animal, plant, even human—in this exploration of both poetry and the natural world. Facklam's playful rhymes mixed with Long's vivid illustrations introduce young readers to an array of creatures as they munch on lunch. From a mantis perched and ready to prey on ladybugs, a spider trapping a fly, to the honey-drenched fur of a big brown bear chewing on a hive full of bees, Bugs for Lunch will give curious readers plenty of food for thought delivered in a playful package. Do you like scavenger hunts? How do you tell if creek water is clean and healthy? Join Lucas and his sister as they act like scientists looking for certain kinds of stream bugs (aquatic macroinvertebrates) that need clean, unpolluted water to survive. What will they find as they turn over rocks, pick up leaves and sort through the mud? Read along to find out if their creek gets a passing grade. This hardcover picture book in the New York Times bestselling Ladybug Girl series explores themes of making friends, compromise, and imaginative play at that favorite preschool place—the playground. Lulu and her dog Bingo meet up with Sam on the playground and want to play together. Sam likes the sandbox but Lulu thinks the monkey bars are better. They just can't agree...until Lulu asks, "Have you ever played Ladybug Girl?" Quickly, Sam becomes the brave Bumblebee Boy, and he and Lulu, a.k.a Ladybug Girl, are superheroes who save the playground from scary monsters and mean robots. New friends want to join their game too, and soon the Bug Squad is formed with

Ladybug Girl, Bumblebee Boy, Dragonfly Girl, and Butterfly Girl using their imaginations to keep the playground safe. For fans of Toot and Puddle and The Amazing Adventures of Bumblebee Boy, the Ladybug Girl series honors friendship, cooperation, and a love of the outdoors! This enthusiastic, witty, and informative introduction to the world of insects and why we could not survive without them is “a joy” (The Times, London) and “charming...Highlighting them in all their buzzing, stinging, biting glory” (The New York Times Book Review). Insects comprise roughly half of the animal kingdom. They live everywhere—deep inside caves, 18,000 feet high in the Himalayas, inside computers, in Yellowstone’s hot springs, and in the ears and nostrils of much larger creatures. There are insects that have ears on their knees, eyes on their penises, and tongues under their feet. Most of us think life would be better without bugs. In fact, life would be impossible without them. Most of us know that we would not have honey without honeybees, but without the pinhead-sized chocolate midge, cocoa flowers would not pollinate. No cocoa, no chocolate. The ink that was used to write the Declaration of Independence was derived from galls on oak trees, which are induced by a small wasp. The fruit fly was essential to medical and biological research experiments that resulted in six Nobel prizes. Blowfly larva can clean difficult wounds; flour beetle larva can digest plastic; several species of insects have been essential to the development of antibiotics. Insects turn dead plants and animals into soil. They pollinate flowers, including crops that we depend on. They provide food for other animals, such as birds and bats. They control organisms that are harmful to humans. Life as we know it depends on these small creatures. “Delivering a hail of facts with brio and precision” (Nature) Anne Sverdrup-Thygeson shows us that there is more variety among insects than we thought possible and the more you learn about insects, the more fascinating they become. Extraordinary Insects is “a very enthusiastic look at the flying, crawling, stinging bug universe world, and why we should cherish it” (The Philadelphia Inquirer). **Note: This book was previously published under the title Buzz, Sting, Bite. Come face to face with the most incredible insects on Earth, where you'll experience the microscopic world of bugs in mind-blowing depth and detail. Super Bug Encyclopedia showcases a huge variety of these tiny creatures at close range, making them millions of times bigger than their true size to give you the complete picture. From ants to wasps and centipedes to spiders, experience amazing anatomy and athleticism and find out who comes out on top for strength and speed. You'll meet the hawkmoth with the longest

tongue of any insect and discover the velvet worm that squirts sticky slime to snare prey. Stand clear as the African bombardier beetle blasts out a sizzling hot chemical attack and race alongside the glorious green tiger beetle that lives life in the fast lane. This stunning visual feast incorporates jaw-dropping photography, at-a-glance facts, amazing statistics, dashboard-style profiles, and expert information to give you an unprecedented insight into the complex life of creepy crawlies. Did you know bugs are the most successful creatures on our planet? Or that insects took flight 150 million years before the first bird? Find out all this and much, much more inside as you become the ultimate bug hunter. In *Insects*, early readers learn about the defining characteristics of this animal group. Vibrant, full-color photos and carefully leveled text will engage early readers as they discover what features set these animals apart. A labeled diagram helps readers identify body parts of an insect, while a picture glossary reinforces new vocabulary. Children can learn more about insects online using our safe search engine that provides relevant, age-appropriate websites. *Insects* also features reading tips for teachers and parents, a table of contents, and an index. *Insects* is part of Jump!'s Animal Classification series.
