Little Trains to Faraway Places Oct 26 2020 Narrow-gauge railroading conjures images of marginal track, wooden coaches, and antique steam locomotives. Yet consider the extraordinarily glamorous and comfortable South African Blue Train and Australia's Queenslander as well as the electrified network of meter-gauge mountain railways in Switzerland that run with a precision similar to that of the country's famed timepieces. Often used to penetrate the most challenging and breathtaking terrain that larger trains are unable to reach, narrow-gauge railways offer even the most seasoned of travelers an experience to remember. Karl Zimmermann, railroad author and accomplished photographer, chronicles his journeys aboard these rarest of trains. Individual chapters weave history and travelogue, complemented by more than 100 color illustrations. The result is a

spirited tribute to the world's most charismatic railways.

**Tibet** Nov 14 2019 Exploring ethnic Tibet independently is a challenge. With the 'land of snows' having some of the wildest and roughest road routes in high Asia, motoring, mountain-biking and trekking options are all given due attention in this new edition. High quality, numerous maps set this guide apart from other guides on Tibet and the trekking section has been expanded to include more on the main treks, including Everest Base Camp, Genden to Samye, Namtso trek and Kailiash region treks. Particular attention has been paid to the Amdo and Kham regions, not usually covered in guidebooks. Political and cultural issues make Tibet a sensitive destination for Westerners, so Michael Buckley's authoritative advice includes guidelines on cultural etiquette, local customs, and travelling with minimum impact on the culture and environment. The chapter on language includes a section covering Tibetan script.

**Adventures of a Railway Nomad** Feb 22 2023 One August morning, I walked out of my Seville home taking nothing but a small, roll-aboard bag, a EuRail pass, and my husband. We were traveling with no fixed time limit, no reservations, and only a loose idea of our itinerary. Our goal was to see if we could still have the kind of spontaneous adventures we'd enjoyed in our youth. We spent three months on trains, mostly in Eastern Europe, and the results - often hilarious, occasionally harrowing, definitely life-changing - form the basis of my new book, *Adventures of a Railway Nomad: How Our Journeys Guide Us Home*.

The Agricultural Systems of the World Apr 19 2020 This book is about the major agricultural systems of the world and the history and processes behind these systems.

*Murder in the High Himalaya* Sep 05 2021 On September 30, 2006 gunfire echoed through the thin air near Advance Base Camp on Cho Oyu Mountain. Frequented by thousands of climbers each year, Cho Oyu lies nineteen miles east of Mt. Everest on the border between Tibet and Nepal. To the elite mountaineering community, it offers a straightforward summit -- a warm-up climb to her formidable sister. To Tibetans, Cho Oyu promises a gateway to freedom through a secret glacial path: the Nangpa La. *Murder in the High Himalaya* is the unforgettable account of the brutal killing of Kelsang Namtso -- a seventeen-year-old Tibetan nun fleeing to India -- by Chinese border guards. Witnessed by dozens of Western climbers, Kelsang's death sparked an international debate over China's savage oppression of Tibet. Adventure reporter Jonathan Green has gained rare entrance into this shadow-land at the rooftop of the world. In his affecting portrait of modern Tibet, Green raises enduring questions about morality and the lengths we go to achieve freedom.

Nomad's Land Nov 26 2020 During the nineteenth century, the development and

codification of forest science in France were closely linked to Provence's time-honored tradition of mobile pastoralism, which formed a major part of the economy. At the beginning of the century, pastoralism also featured prominently in the economies and social traditions of North Africa and southwestern Anatolia until French forest agents implemented ideas and practices for forest management in these areas aimed largely at regulating and marginalizing Mediterranean mobile pastoral traditions. These practices changed not only landscapes but also the social order of these three Mediterranean societies and the nature of French colonial administration. In *Nomad's Land* Andrea E. Duffy investigates the relationship between Mediterranean mobile pastoralism and nineteenth-century French forestry through case studies in Provence, French colonial Algeria, and Ottoman Anatolia. By restricting the use of shared spaces, foresters helped bring the populations of Provence and Algeria under the control of the state, and French scientific forestry became a medium for state initiatives to sedentarize mobile pastoral groups in Anatolia. Locals responded through petitions, arson, violence, compromise, and adaptation. Duffy shows that French efforts to promote scientific forestry both internally and abroad were intimately tied to empire building and paralleled the solidification of Western narratives condemning the pastoral tradition, leading to sometimes tragic outcomes for both the environment and pastoralists.

**Distant Ties** Aug 04 2021 As the first study to document the Baghdad Railway construction, rather than the rhetoric surrounding it, this work challenges nearly a century of scholarship on German imperialism and Ottoman decline--scholarship that has too often hinged on the alleged Great Power victimization of the Ottoman Empire. McMurray unearths a fascinating, intercultural dimension of the railway and provides a comprehensive, detailed account of the Ottoman contribution. His work denies the German character of the railway by showing it to be an exclusively Ottoman enterprise designed by German engineers, funded by international capital, and built by a veritable army of Ottoman subjects. The study refutes the notion that German involvement in the Baghdad Railway somehow represented an orchestrated plunder of the Ottoman Empire. It reveals instead, the benefits this union bestowed on the Ottomans despite growing discord between Germany's leading political, financial, and cultural advocates of the railway. It traces back to the genesis of German interest in the enterprise before the Age of Empire, and it shows that the initial impetus came from private individuals whose commitment to improve the empire's infrastructure lay anchored in the hope that the Ottoman Empire would one day become Germany's ally. Finally, it reveals that German involvement with the railway did not traumatize the Ottoman Empire, but rather offered it a new lease on life, helping to strengthen the Ottomans' resolve to counter further European incursion.

**The Ballantines** Jul 23 2020 Seventy years ago, an Ivy League-educated lawyer, his wife from a prominent Midwestern media family, and their four children moved to a small town in Southwestern Colorado. They bought two struggling newspapers, melded them into one and started building a legacy – one issue at a time. Arthur and Morley Ballantine not only made Durango their home, they helped mobilize their fellow business owners and neighbors to transform that sleepy little community into a thriving center of education, culture, enterprise, and philanthropy. The *Durango Herald* quickly became known as an award-winning publication staffed with hard-working, industrious journalists who wouldn’t shy from an important story, no matter who might want it quashed. This is the story of a community-minded family with deep connections in the highest levels of government and education. It is the story of how their newspaper has kept its subscribers informed of important issues and news stories big and small. It is a reminder of local newspapers’ unique role as the glue that binds and enlightens the people of their towns. *The Ballantines: Building Community Issue by Issue* not only traces the history of a remarkable family, but also reminds us of the vital role

that quality journalism plays as the underpinning of a community.

The Berlin-Baghdad Express Jul 15 2022 'Sean McMeekin has written a classic of First World War history ... This superb and original book is the reality behind Greenmantle' Norman Stone The Berlin-Baghdad Express explores one of the big, previously unresearched subjects of the First World War: the German bid for world power - and the destruction of the British Empire - through the harnessing of the Ottoman Empire. McMeekin's book shows how incredibly high the stakes were in the Middle East - with the Germans in the tantalizing position of taking over the core of the British Empire via the extraordinary railway that would link Central Europe and the Persian Gulf. Germany sought the Ottoman Empire as an ally to create jihad against the British - whose Empire at the time was the largest Islamic power in the world. The Berlin-Baghdad Express is a fascinating account of western interference in the Middle East and its lamentable results. It explains and brings to life a massive area of fighting, which in most other accounts is restricted to the disaster at Gallipoli and the British invasions of Iraq and Palestine.

**Nomad+Design** Apr 12 2022 The modern nomad: the coffee-toting commuter, the automobile driver, the men and women who funnel into the underground railway stations at the end of a busy day... Nomad+Design is not just a book. It is a theoretical and cognitive survey instrument, which discusses the phenomenon of migration as a necessary consideration at every stage of cityscape and urban design. This is a series of books, designed to explore architectural practices through a multidisciplinary approach. Topics engaged with in the first book included the concept of a 'global network city', the trans-nationalisation of

migration routes, expanding communication technologies, and methods of tracking and measuring the dynamic flow of people. This, the second book, explores the logic of mobility and transience. It identifies changing behaviours among commuters, studying how poor habits of consumption, hybridisation and contamination have both discouraged and enforced a nomadic lifestyle. Both books also discuss the performative aspect of design. The abstract theoretical concepts featured herein are given a concrete base in case studies. **Broadband Wireless Communications for Railway Applications** Nov 19 2022

This book focuses on the needs of railway operators in terms of wireless communications, divided in two main categories: the commercial services and the operational needs. Then, all available technologies that can be used to provide Internet access on board trains and all the other operational applications requiring high capacity are detailed. Finally, challenges and trends in railway telecommunications are highlighted, through the presentation of the future and emerging technologies, the current discussions and works in the different authorities, and the key challenges and scientific barriers.

**The Figure of the Migrant** Jun 02 2021 This book offers a much-needed new political theory of an old phenomenon. The last decade alone has marked the highest number of migrations in recorded history. Constrained by environmental, economic, and political instability, scores of people are on the move. But other sorts of changes—from global tourism to undocumented labor—have led to the fact that to some extent, we are all becoming migrants. The migrant has become the political figure of our time. Rather than viewing migration as the exception to the rule of political fixity and citizenship, Thomas Nail reinterprets the history of

political power from the perspective of the movement that defines the migrant in the first place. Applying his "kinopolitics" to several major historical conditions (territorial, political, juridical, and economic) and figures of migration (the nomad, the barbarian, the vagabond, and the proletariat), he provides fresh tools for the analysis of contemporary migration.

Free As a Global Nomad Jun 14 2022 *Free as a Global Nomad: An Old Tradition with a Modern Twist* How does it feel to be forever on the move? Who are global nomads? Why did they leave their former lives? How do they finance their travels? And, ultimately, what is the meaning of life for them? In this book our fellow global nomads, travelers who wander the world without a permanent job or home, answer these intriguing questions. They are modern-day adventurers and vagrants, no one's property. Global nomads value freedom and mastery of their own lives. Their ideas draw from the everyday life and dreams of explorers, philosophers, and vagrants, some notable pioneers including Alexander the Great, Jean-Jacques Rousseau, and George Orwell. This book shows how global nomads revive the ancient ideals of a simple and beautiful life. In the process, home, nationality, freedom, and travel get a new meaning that will permanently change the way in which we perceive the world. When Paivi & Santeri met, they decided to quit their jobs and devote their time to each other and travelling. This was the beginning of a new life as global nomads in 2004. They have only one plan: no plans.

*China's Great Train* May 13 2022 A vivid account of China's unstoppable quest to build a railway into Tibet, and its obsession to transform its land and its people In the summer of 2006, the Chinese government fulfilled a fifty-year plan to build a railway into Tibet. Since Mao Zedong first envisioned it, the line had grown into an imperative, a critical component of China's breakneck expansion and the final maneuver in strengthening China's grip over this remote and often mystical frontier, which promised rich resources and geographic supremacy over South Asia. Through the lives of the Chinese and Tibetans swept up in the project, Fortune magazine writer Abraham Lustgarten explores the "Wild West" atmosphere of the Chinese economy today. He follows innovative Chinese engineer Zhang Luxin as he makes the train's route over the treacherous mountains and permafrost possible (for now), and the tenacious Tibetan shopkeeper Rinzen, who struggles to hold on to his business in a boomtown that increasingly favors the Han Chinese. As the railway—the highest and steepest in the world—extends to Lhasa, and China's "Go West" campaign delivers waves of rural poor eager to make their fortunes, their lives and communities fundamentally change, sometimes for good, sometimes not. Lustgarten's book is a timely, provocative, and absorbing first-hand account of the Chinese boom and the promise and costs of rapid development on the country's people.

**Nomad's Land** Sep 24 2020 A memoir of desert travel -- by camel and horseback -- from a beloved author. An internationally renowned writer of mystery fiction,

Mary Roberts Rinehart knows her way around an exotic setting. When faced with the Pyramids, the Nile, and the sprawling Egyptian desert in her own life, she does not fall in with the crowd of tourists waiting in line at the tombs of the Pharaohs. Instead, she hikes up her skirt, plants her pumps in the sand, and hops on a camel. She has but one question: Where am I supposed to sit? On a hundred-mile expedition into the Egyptian desert, Rinehart does her best to master the herky-jerk of this desert beast. But traveling with an entourage of well-mannered people, she finds that desert living is not completely stripped of the comforts of home. Upon returning to the United States, Rinehart makes an excursion out west, which, she finds, is where the true adventure begins.
