*The Great Savannah Races* Jan 17 2020 While automobile races had been held in Europe earlier, it was not until after 1900 that

organized races were held in the United States. These contests took the form of road races--usually over a series of connected links of the best roads available. The most important of the early races were held on Long Island, New York. As a result of the efforts of the Savannah Automobile Club, the International Grand Prize Race of the Automobile Club of America was held in Savannah, Georgia, for the first time in November of 1908 and was enormously successful. In 1910 and again in 1911 the most famous drivers and the finest racing cars from all over the world returned to the city for the Grand Prize Race. The 1911 event attracted thousands more who came to witness the famous Vanderbilt Cup Race, the fastest race of this length up to that time (291 miles in 3 hours and 56 minutes). Julian K. Quattlebaum was among those who lined the Savannah race course for a glimpse of the big Fiats, Loziers, and Mercedes that roared around the turns, across the finish line, and into autoracing history. He has written a new introduction to this edition and has gone through his collection of early photographs of the cars, the drivers, and the races to add to the generous selection of illustrations in the original edition.

Significant Issues of Legal Regulation of Vehicle Owners' Civil Liability Insurance in Georgia Jun 14 2022 The article deals with vehicle owners' civil liability insurance as the third party car insurance and social mechanism of security and highlights its significance under present conditions. On the basis of an analysis of the constitutional practices, it studies Georgian law on vehicle owners' civil liability insurance, whether it was expedient to abolish the previous law and anticipated results that would follow enactment of a new law and undoubtedly occur in case of introducing vehicle owners' civil liability insurance in respect of all motor vehicles, not limited to transit cars only. The article encompasses recommendations and modest suggestions. The work compiles the results of the research based on vehicle owners' awareness survey of the law on insurance and their attitudes towards it. **The Transformation of Georgia from 2004 to 2012** Sep 17 2022 How can developing countries become high-income nations? What are the reference points for measuring national development, public leadership and government performance? What is the nexus between public policies and geopolitical, political, emotional, historical, national governance-related, social and cultural norms, forces and factors which shape the process of the state building? This second edition of the book elaborates on many of these critical interconnections, focusing on 9 years after Georgia's Revolution of Roses in November 2003. The book explains what can be accomplished in two electoral terms at a given starting level of GDP per capita and which pitfalls to avoid. It contributes to documenting an almost decade-long history of Georgia.
