Leon Battista Alberti Aug 23 2020 A lucid biographical study of a key figure of European culture Leon Battista Alberti (1404-72) was one of the most original, creative, and exciting figures of the Italian Renaissance. He wrote the first modern treatise on painting, the first modern manual of classical architecture, and a powerful set of "dialogues" about the princely families that dominated his home city of Florence. He rediscovered the forgotten aesthetics of classical architecture and described, in incomparably vivid terms, the artistic revolution in Florence that began what we now call the Renaissance. But Alberti was more than a mere chronicler--he practiced what he preached. He made spectacular advances in the art of painting and in engineering, and as an architect he was responsible for some of the

most exciting buildings in Italy. Yet in spite of his central importance, work on Alberti has for the most part been confined to scholarly monographs. Here, one of our greatest Renaissance scholars offers the general book that Alberti has so long deserved. This is a compelling portrait of a mysterious, original, and highly unusual intellectual, and a colorful tableau of the cities and courts in which he lived and worked.

Ontologies for Agents: Theory and Experiences Apr 30 2021 The volume aims at providing a comprehensive review of the diverse

efforts covering the gap existing between the two main perspectives on the topic of ontologies for multi-agent systems, namely: How ontologies should be modelled and represented in order to be effectively used in agent systems, and on the other hand, what kind of capabilities should be exhibited by an agent in order to make use of ontological knowledge and to perform efficient reasoning with it. The volume collects the most significant papers of the AAMAS 2002 and AAMAS 2003 workshop on ontologies for agent systems, and the EKAW 2002 workshop on ontologies for multi-agent systems.
