Devices for Streets and Highways

The Manual on Uniform Traffic Control
Devices (MUTCD) defines the standards used
by road managers nationwide to install and
maintain traffic control devices on all
streets and highways. Although the MUTCD
is routinely updated to include amendments
that clarify new standards and incorporate
technical advances, it has been more than
20 years since the manual was entirely
rewritten, and the most recent edition was
published in 1988. The new MUTCD is
published in 3-ring binders for easy

updating, on CD-ROM, and on the Internet. The Manual on Uniform Traffic Control Devices, or MUTCD defines the standards used by road managers nationwide to install and maintain traffic control devices on all public streets, highways, bikeways, and private roads open to public traffic. The MUTCD is published by the Federal Highway Administration (FHWA) under 23 Code of Federal Regulations (CFR), Part 655, Subpart F. The MUTCD, which has been administered by the FHWA since 1971, is a compilation of national standards for all traffic control devices, including road markings, highway signs, and traffic signals. It is updated periodically to accommodate the nation's changing transportation needs and address new safety technologies, traffic control tools and traffic management techniques. On May 14, 2012 final rules adopting Revisions 1 and 2 of the 2009, MUTCD were published in the Federal Register with an effective date of June 13, 2012. These are also included in this manual
