Arctic Food Chains Apr 29 2021 In Arctic Food Chains, early fluent readers explore the Arctic biome and the food chains it supports. Vibrant, full-color photos and carefully leveled text engage young readers as they explore how energy flows through plants and animals in the environment. A map helps readers locate the Arctic region, and an activity offers kids a chance to extend discovery. Children can learn more about Arctic food chains using a safe search engine that provides relevant, age-appropriate websites. Arctic Food Chains features reading tips for teachers and parents, a table of contents, a glossary, and an index. Arctic Food Chains is part of Jump!'s Who Eats What? series.

The Early Years, 4-Stroke Engines Make Their Debut Dec 19 2020 This collection is a resource for studying the history of the evolving technologies that have contributed to snowmobiles becoming cleaner and quieter machines. Papers address design for a snowmobile using ethanol gasoline (10% ethanol mixed with pump gasoline). Performance technologies that are p

include: • Engine Design: application of the four-stroke engine • Applications to address engine and track noise • Exhaust After-treatment to reduce emissions The SAE International Clean Snowmobile Challenge (CSC) program is an engineering design competition. The program provides undergraduate and graduate students the opportunity to enhance their engineering design and project management skills by reengineering a snowmobile to reduce emissions and noise. The competition includes internal combustion engine categories that address both gasoline and diesel, as well as the zero emissions category in which range and draw bar performance are measured. The goal of the competition is designing a cleaner, quieter snowmobile. The competitors' modified snowmobiles are also expected to be cost-effective and comfortable for the operator to drive.

Motorcycle Touring in the Pacific Northwest Dec 26 2020 Motorcycle Touring in the Pacific Northwest is an indispensable tool for anyone hoping to take in the beauty of the region back of a motorcycle. The tone of the book is casual and reader-friendly, peppered with anecdotes, interesting observations, sidebars and friendly asides.

Reindeer Apr 17 2020 "In this books, readers learn about the life and habits of reindeer." Rocketman Jun 12 2022 Since the 1960s, Ky Michaelson's rocket-powered vehicles have set state, national, and international speed records. His penchant for the unknown and passion for speed have been with him since childhood, when he built his first rocket-powered motorcycle. After earning his first world record--for a rocket-powered snowmobile--he decided to attempt every acceleration record in the world. This is Ky's story, the life of a driven--or rocket-powered--man. Ky tells about how he began and where he's gone, about his work on Hollywood film and television programs, and about his service as program director of "SPACESHOT 2004"--the grand effort of the Civilian Space Exploration Team (CSXT) to build and launch the first amateur rocket into space. And he describes reaching the "impossible dream" as the first amateur to license, and successfully launch, the Go Fast Rocket into space, with an altitude of 72 miles--and a new speed record of 3,420 mph.

Field & Stream Aug 14 2022 FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and soulful art, while honoring the traditions hunters and fishermen have passed down for generations.

Snowy Owl Nov 12 2019 A snowy owl silently glides to an open tree branch. It waits and listens for prey to come near. Then, it swoops down to grab its next meal! In this low-key book, readers will discover how these birds thrive in the Arctic biome. Engaging text and a scientific graphic explore the snowy owl's adaptations, while a profile and diet feature provide essential information about snowy owls. Readers will be impressed by the survival skills of these hunters!

Collared Lemmings Jan 07 2022 "In this book, readers learn about the life and habits of collared lemmings."--

This Little Light of Mine Jan 19 2023 In April of 2000, seventh-grader Kevin Triplett learned he has osteosarcoma, a rare form of bone cancer. Kevin fights a courageous battle, and his father, Wayne, does everything within his power to help his son win the greatest fight of his life. Kevin battles his disease valiantly, submitting himself to many cutting-edge, newly discovered therapies. He keeps his spirits high during his treatments, learns to play the guitar, and eventually forms a Christian rock band. Most importantly, his faith in Jesus Christ carries him through the journey, which ends in 2006. Kevin touches many lives, and the positive influence he has on people, young and old, endears him to everyone. This Little Light Of Mine is the story of a courageous battle against cancer and is peppered with many personal recollections. Grounded in an uncompromising faith in Jesus Christ, Kevin knows that whatever happens during his battle, he will be fine. An inspiring, true story of a son's perseverance and a father's determination to keep him alive, this must read book offers encouragement to all cancer patients and their families.

The Death of Expertise Jan 15 2020 Technology and increasing levels of education have exposed people to more information than ever before. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crowded out informed debates on any number of issues. Today, everyone knows everything: with one quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, deserve to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. Tom Nichols' *The Death of Expertise* shows how this rejection of experts has occurred. It is the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment industry among other reasons. Paradoxically, the increasingly democratic dissemination of information rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. When ordinary citizens believe that one knows more than anyone else, democratic institutions themselves are in danger of succumbing either to populism or to technocracy or, in the worst case, a combination of both. Another breakout hit, the paperback edition of *The Death of Expertise* provides a new perspective to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election. Judging from events on the ground since it first published, *The Death of Expertise* issues a warning about the stability and survival of modern democracy in the Information Age.

even more important today.

Peary's Arctic Quest Oct 12 2019 This richly illustrated book takes a different angle on Robert E. Peary's North Pole expedition. By shifting the focus away from the unanswerable question of whether he truly reached 90° North Latitude, the authors shed light on equally important and discoveries that arose as a result of the infamous expedition. Peary's Arctic Quest goes beyond the well-cited story of Peary's expedition and uncovers the truth about race relations, womens' scientific contributions, and climate change that are still relevant today. Readers gain a greater appreciation for Peary's methodical and creative mind, the Inughuit's significant contributions to Arctic exploration, and the impact of Western expedition on the Inughuit community. The volume will also feature artifacts, drawings, and historic photographs with informative captions to tell little-known stories about Peary's 1908-1909 North Pole expedition.
