"It was an exceptional winter." With deceptive understatement, Orly Castel-Bloom draws back the curtain on her disturbing, revelatory novel set in Israel during the Al Aksa intifada. This is a world already regularly interrupted by terrorist ambushes and suicide bombs. And now it is further plagued by a Saudi flu that is decimating the population, and by apocalyptic weather that brings a ruinous winter after eight years of drought. The economy is shot to pieces. Hail stones as big as dinner plates are falling from the sky. And yet, against this backdrop of monumental affliction, ordinary people are still trying to lead normal lives. Kati Beit-Halahmi, an impoverished cleaner, is snatched up by a community television program and given her full fifteen-minutes-of-fame. Iris Ventura, divorced with three children, is wondering how she can afford both to replace her broken washing machine and have some essential dental work done. And the Israeli president, Reuven Tekoa, travels from hospital to funeral, musing on the state of the nation from the back of his limousine. Orly Castel-Bloom spins a web of filament-fine connections between her characters whose preoccupations, she reminds us, are not so very different from our own. Death or disaster might intrude at any moment, but people still watch game shows on TV, go to the laundromat and train to be beauticians. I just don't know what's going onOr why it has to beBut every day it's something worseWhat's happening to me?So begins this uproarious new story from the best-selling creator of No Jumping on the Bed!,Green Wilma, and other popular books. The young narrator has discovered a disturbing trend: There's fuzz in his belly button his toes are peeling and something just fell out of his nose. The last straw is a loose tooth, which convinces him of the awful truth his parts are coming unglued!Parts deals with a subject of deepest interest to every young child: the stuff our bodies shed. Parents will appreciate the reassuring message that it's all quite normal, while Tedd Arnold's comical illustrations and rhyming text are guaranteed to make young readers laugh their heads off. Give me a hand . . . hold your tongue . . . scream your lungs out . . . what's a kid to do if he wants to keep all his body parts in place? Well, one thing is for sure, he'll have to be creative. Like, if you want to keep your heart from breaking, just make sure it's well padded and protected by tying a pillow around your chest. Want to keep your hands attached? Simple-stick them on with gloves and lots of glue. Just be careful not to laugh your head off! Using the forms of the Roman Catholic mass, these poems address the scientific definition of "mass" as well as the aesthetic and social challenges of our day. All with great musicality and exuberant playfulness. The plant's cells and their several specialized working subunits are examined in addition to chemical traits like color, scent, and the hormonal effects that turn leaves toward the light and allow other adaptations to the surroundings. And the major processes driven by chemical changes over time that together are the life cycle of the plant are considered."--BOOK JACKET.
