Introduces the elements considered essential to English literature, in which writing became more personal and had a new sense of humanity. Studie over ergonomie en arbeidsomstandigheden Techniques based on the method of modal expansions, the Rayleigh-Stevenson expansion in inverse powers of the wavelength, and also the method of moments solution of integral equations are essentially restricted to the analysis of electromagnetic radiating structures which are small in terms of the wavelength. It therefore becomes necessary to employ approximations based on "high-frequency techniques" for performing an efficient analysis of electromagnetic radiating systems that are large in terms of the wavelength. One of the most versatile and useful high-frequency techniques is the geometrical theory of diffraction (GTD), which was developed around 1951 by J. B. Keller [1,2,3]. A class of diffracted rays are introduced systematically in the GTD via a generalization of the concepts of classical geometrical optics (GO). According to the GTD these diffracted rays exist in addition to the usual incident, reflected, and transmitted rays of GO. The diffracted rays in the GTD originate from certain "localized" regions on the surface of a radiating structure, such as at discontinuities in the geometrical and electrical properties of a surface, and at points of grazing incidence on a smooth convex surface as illustrated in Fig. 1. In particular, the diffracted rays can enter into the GO shadow as well as the lit regions. Consequently, the diffracted rays entirely account for the fields in the shadow region where the GO rays cannot exist. An examination of the workings of Radio Free Europe and Radio Liberty during the period in which the two broadcast organizations were covertly supported by the CIA. The premiere volume includes articles on a multiband portable, quads and loops, baluns, the Smith Chart, and more. A post-apocalyptic thriller of the after effects in the United States after a terrifying terrorist attack using electromagnetic pulse weapons. New York Times best selling author William R. Forstchen now brings us a story which can be all too terrifyingly real...a story in which one man struggles to save his family and his small North Carolina town after America loses a war, in one second, a war that will send America back to the Dark Ages...A war based upon a weapon, an Electro Magnetic Pulse (EMP). A weapon that may already be in the hands of our enemies. Months before publication, *One Second After* has already been cited on the floor of Congress as a book all Americans should read, a book already being discussed in the corridors of the Pentagon as a truly realistic look at a weapon and its awesome power to destroy the entire United States, literally within one second. It is a weapon that the Wall Street Journal warns could shatter America. In the tradition of *On the Beach*, *Fail Safe* and *Testament*, this book, set in a typical American town, is a dire warning of what might be our future...and our end. The first manned space flight in history was accomplished

on April 12, 1961, when the Soviet spaceship Vostok (East) orbited the earth and made a safe landing. The first man in space was 27 year old Yuri Alexeyevich Gagarin, a citizen of the Union of Soviet Socialist Republics. After successful launching in the multi-stage space rocket the satellite ship, having attained orbital velocity and separated from the last stage of the carrier-rocket, had begun free orbital flight round the earth. According to preliminary data, orbital period of the spaceship is 89.1 minutes; its minimum distance from the earth's surface (perigee) is 175 kilometers and its maximum (apogee), 302 kilometers; the orbit is inclined to the equator at  $65^{\circ}4'$ . Together with its pilot, the spaceship weighs 4,725 kilograms excluding the weight of the last stage of the launching rocket. Two-way radio communication has been established, and is being maintained, with the spaceman, Major Gagarin. The ship's short-wave transmitters are operating on 9.019 megacycles and 20.006 megacycles, and on 143.625 megacycles in the ultra short -wave band. The condition of the space pilot during flight is being observed by means of radio telemetering and television systems. Major Gagarin, the space pilot, withstood the period of acceleration satisfactorily and at present feels quite well. The systems enduring the necessary life conditions in the cabin of the spaceship are functioning normally. The flight of the Vostok with Major Gagarin on board continues... This is the definitive guide on how to prepare for any crisis, from global financial collapse to a flu pandemic. It would only take one unthinkable event to disrupt our way of life. If there is a terrorist attack, a flu pandemic, or sharp currency devaluation, you may be forced to fend for yourself in ways you've never imagined. Where would you get water? How would you communicate with relatives? What would you use for fuel? Survivalist expert James Wesley, Rawles, editor of SurvivalBlog.com and a former US Army Intelligence officer, shares the essential tools and skills you will need for your family to survive, including how to find and build a retreat, store food, supply power, rear animals, administer medicine, barter, and defend your family. 'Save those wine corks. Burned cork makes quick and cheap face camouflage.' 'Store only foods with minimal spices. When you are surrounded by starving people, just heating up a can of spicy chili con carne could be a death warrant.' 'If you are on a budget, you might get away with a good-quality bolt-action rifle...' 1000 photographs of Hallicrafters radio receivers, transmitters and speakers, early television sets, electronics accessories and advertising material produced by this Chicago-based firm. Technical descriptions are provided for every known Hallicrafters model, including dates of production, model numbers, accompanying pieces, and original prices. The book examines the role of Western broadcasting to the Soviet Union and Eastern Europe during the Cold War, with a focus on Radio Free Europe and Radio Liberty. It includes chapters by radio veterans and by scholars who have conducted research on the subject in once-secret Soviet bloc archives and in Western records. It also contains a selection of translated documents from formerly secret Soviet and East European archives, most of them published here for the first time. "World Radio TV Handbook is the world's most accurate and comprehensive directory of global broadcasting. It contains full details by country of radio broadcasts and broadcasters on LW, MW (AM), SW and FM, and details of national TV. The Features section for this 76th edition includes articles on the Further Development of HF Transmitters, the history of Radio in Lesotho, Over 75 Years With My Radio by Ullmar Qvick, Technical Monitoring at VOA by Bill Whitacre, and the history of KTWR on Guam, as well as other regular articles and world maps. There are also reviews of the latest equipment including Sangean's ATS-909x2, Icom's IC-705, the Tecsun H-501 and Tecsun PL-330, Cross Country Wireless's loop antenna amplifier, and the ATS25 Si4732. The remaining pages are full of information on National and International broadcasts and broadcasters, Clandestine and other target broadcasters, MW and SW frequency listings, and an extensive Reference section."--Amazon.com SolderSmoke is the story of a secret, after-hours life in electronics. Bill Meara started out as a normal kid, from a normal American town. But around the age of 12 he got interested in electronics, and he has never been the same. To make matters worse, when he got older he became a diplomat. His work has taken him to Panama, Honduras, El Salvador, the Spanish Basque Country, the Dominican Republic, the Azores islands of Portugal, London, and, most recently, Rome. In almost all of these places his addiction to electronics caused him to seek out like-minded radio fiends, to stay up late into the night working on strange projects, and to build embarrassingly large antennas above innocent foreign neighborhoods. SolderSmoke takes you into the basement workshops and electronics parts stores

of these exotic foreign places, and lets you experience the life of an expatriate geek. If you are looking for restaurant or hotel recommendations, look elsewhere. But if you need to know where to get an RF choke re-wound in Santo Domingo, SolderSmoke is the book for you. SolderSmoke is no ordinary memoir. It is a technical memoir. Each chapter contains descriptions of Bill's struggles to understand (really understand) radio-electronic theory. Why does  $P=IE$ ? Do holes really flow through transistors? What is a radio wave? How does a frequency mixer produce sum and difference frequencies? If these are the kinds of questions that keep you up at night, this book is for you. Finally, SolderSmoke is about brotherhood. International, cross-border brotherhood. Through the SolderSmoke podcast we have discovered that all around the world, in countries as different as Sudan and Switzerland, there are geeks just like us, guys with essentially the same story, guys who got interested in radio and electronics as teenagers, and who have stuck with it ever since. Our technical addiction gives us something in common, something that transcends national differences. And our electronics gives us the means to communicate. United by a common interest in radio, and drawn closer together by means of the internet, we form an "International Brotherhood of Electronic Wizards." World band radio is a trusted source of daily entertainment and crisis reporting for millions of Americans. Passport, the #1 seller in the field, provides exactly what world band listeners want. Entering its 21st year, it outsells all competitors combined. During the Cold War, Radio Free Europe and Radio Liberty broadcast uncensored news and commentary to people living in communist nations. As critical elements of the CIA's early covert activities against communist regimes in Eastern Europe, the Munich-based stations drew a large audience despite efforts to jam the broadcasts and ban citizens from listening to them. This history of the stations in the Cold War era reveals the perils their staff faced from the Soviet Union, Bulgaria, Romania and other communist states. It recounts in detail the murder of writer Georgi Markov, the 1981 bombing of the stations by "Carlos the Jackal," infiltration by KGB agent Oleg Tumanov and other events. Appendices include security reports, letters between Carlos the Jackal and German terrorist Johannes Weinrich and other documents, many of which have never been published. Details the evolution of literature and explores the writers, works, and events that have shaped literature. From the author of the instant "New York Times"-bestseller "Survivors," comes its follow-up: another lightning-paced thriller about survival in America after an apocalyptic socioeconomic crash. After decades of being forgotten, northern Peru has finally begun emerging from the shadows of the country's better-known south. The magnificent ruins at Kuelap, the Gocta waterfall, the historical cities of Cajamarca and Trujillo, and jungle excursions along the Huallaga River are up-and-coming destinations for more adventurous travelers seeking to avoid the crowds in the south. And yet, northern Peru wasn't always unexplored territory for travelers. In the 19th century, the long-forgotten Moyobamba Route was the main connection between Peru's Pacific coast and the Amazon River. Among the adventurers who rode the old mule trails were a Royal Navy lieutenant, a Swiss nobleman, a French reporter, an American professor, and a famous early British aviator. Recently retired, the author set off to follow the ghosts of these and other early travelers, weaving together their stories with his own adventures each step of the way. But the story of the Moyobamba Route is just as much about the people who lived there as those who wandered through. A Utopian bishop, a mountain warlord, a jungle-raised feminist, a future Hollywood starlet, war heroes, German immigrants, entrepreneurs, and missionaries are among the characters who make up the region's rich history. Drawing on original Spanish language materials for much of the Peruvian history, the author brings some of their stories to English language readers for the very first time. From the master of the wartime espionage novel; a thrilling story of subterfuge at sea May 1941. At four in the morning, a rust-streaked tramp freighter steams up the Tagus river to dock at the port of Lisbon. She is the Santa Rosa, flies the flag of neutral Spain, and is in Lisbon to load cork oak, tinned sardines and drums of cooking oil bound for the Baltic port of Malmo. But she is not the Santa Rosa. She is the Noordendam, a Dutch freighter under the command of Captain Eric DeHaan. She sails for the intelligence division of the British Royal Navy and is involved in a secret mission. On board are a Polish engineer and British spy, Spaniards who fought for Franco and Germans who fought against Hitler. For them, this is a last desperate flight to freedom. Explains how to tune in news and entertainment from countries around the world, rates various world band radios, and provides a detailed broadcasting schedule.
