Managing Natural Resources for Development in Africa May 12 2022 The complex and dynamic interlinks between natural resource management (NRM) and development have long been recognized by national and international research and development organizations and have generated voluminous literature. However, much of what is available in the form of university course books, practical learning manuals and reference materials in NRM is based on experiences from outside Africa. Managing Natural Resources for Development in Africa: A Resource Book provides an understanding of the various levels at which NRM issues occur and are being addressed scientifically, economically, socially and politically. The book's nine chapters present state-of-the-art perspectives within a holistic African context. The book systematically navigates the tricky landscape of integrated NRM, with special reference to Eastern and Southern Africa, against the backdrop of prevailing local, national, regional and global social, economic and environmental challenges. The authors' wide experience, the rich references made to emerging challenges and opportunities, and the presentation of different tools, principles, approaches, case studies and processes make the book a rich and valuable one-stop resource for postgraduate students, researchers, policymakers and NRM practitioners. The book is designed to help the reader grasp in-depth NRM perspectives and presents innovative guidance for research design and problem solving, including review questions, learning activities and recommended further reading. The book was developed through a writeshop process by a multi-disciplinary team of lecturers from the University of Nairobi, Egerton University, Kenyatta University, the University of

Zimbabwe, the University of Malawi, Makerere University and the University of Dar es Salam. In addition, selected NRM experts from regional and international research organizations including the World Agroforestry Center (ICRAF), the Africa Forest Forum, RUFORUM, IIRR and the International Development Research Centre (IDRC) participated in the writeshop and contributed material to the book.

The Dysfluency Resource Book Jan 20 2023 This is a comprehensive resource book for treating adults who stammer. Completely revised and updated to take account of current practice, this new edition draws together the latest information on therapy for adults along with practical examples of exercises, tasks and activities that can be used for both individual and group programmes. With new chapters and therapy ideas, this is an extremely useful resource for all speech & language therapists and students working with adults who stammer. This useful resource seeks to explain techniques for treating people who stammer and the rationale for their use. This volume forms a catalogue of treatment options from which clinicians may choose to use all of the techniques or pick out particular sections according to their clients' special requirements. The first edition of this book proved to be a very useful tool for speech and language professionals, and this new edition has come about largely because clinicians, speech and language therapists and teachers have requested it. With the inclusion of 50 photocopiable handouts and the presentation of the chapters in the order they would use with their own group programmes, the authors set out the principles of

therapy in such a way that the treatment techniques fit into a clear management approach. Trudy Stewart is a specialist in dysfluency and has been a service manager since 1986. She studied in America and obtained her PhD in 1991. Jackie Turnbull retired from SLT in July 2009 after 40 years in the profession, over 35 of which were spent as a specialist in dysfluency, working with children and adults. She also worked for many years as a staff counsellor in a large hospital. The collaboration that has grown up between the two of them has sparked further study in stammering. Together they have developed a highly creative clinical practice which has national recognition.
