Now available in paperback, this vital handbook marks the development of sports studies as a major new discipline within the social sciences. Edited by the leading sociologist of sport, Eric Dunning, and Jay Coakley, author of the best selling textbook on sport in the USA, it both reflects and richly endorses this new found status. Key aspects of the Handbook include: an inventory of the principal achievements in the field; a guide to the chief conflicts and difficulties in the theory and research process; a rallying point for researchers who are established or new to the field, which sets the agenda for future developments; a resource book for teachers who wish to establish new curricula and develop courses and programmes in the area of sports studies. With an international and inter-disciplinary team of contributors the Handbook of Sports Studies is comprehensive in scope, relevant in content and far-reaching in its discussion of future prospect. *Advances in the Study of Aggression, Volume 1* aims to span some of the variety of aggression research, pinpointing areas in which phenomena or concepts that have arisen or been tested extensively with

animal models are now being applied to human aggression. Chapter 1 presents an article on the relevance of animal aggression research to human aggression and discusses a brief sociobiological view of aggression and its immediate determinants over a number of mammalian species. A description of some features of human aggression and endeavor and its link to the animal model is also considered in this chapter. Chapter 2 is an article on the biological explanations of human aggression and the resulting therapies offered by such approaches, and Chapter 3 is an article on the development of stable aggressive reaction patterns in males. The next chapter is about the control of aggressive behavior by changes in attitudes, values, and the conditions of learning. Chapter 5 describes the coercive interactions of siblings and parents as well as those for siblings and identified problem children. Differences in sibling reactions between normal and distressed families together with the relationship of these differences to increased rates of coercive behaviors in distressed families are encompassed in this chapter. The text concludes by discussing advances in aggression research.

Psychologists, psychiatrists, sociologists, anthropologists will find the book invaluable. Olivier Blanchard, former chief economist of the International Monetary Fund (IMF), is author of one of the most important standard macroeconomics textbooks which is used throughout the world. Endorsed by Blanchard himself, *Anti-Blanchard Macroeconomics* critically analyses prevailing economic theory and policy in comparison with alternative approaches. This textbook is designed to stand alongside Blanchard's text, or indeed any other standard book on macroeconomics, but it can also be read independently. It provides undergraduate and advanced students with a critical view of the subject, and is also appropriate for scholars interested in a new way of analysing the debate between alternative schools of economic thought. This study guide is an individually available part of the authors' "Lead Like Jesus" kit. Only one study guide is included in the initial kit, but churches or organizations can buy as many study guides as needed for their leadership groups. There is plenty of room for writing as the concepts are explored via group and individual activities. This volume is the outcome of a NATO Advanced Study Institute on the Ethoexperimental Analysis of Behavior, which was held at Il Ciocco in

Tuscany, in July, 1988. This particular ASI had an interesting history. In 1980, a NATO ASI on the topic of the Biology of Aggression was held in Bonas, France. This meeting brought together a group of European and American researchers and students from diverse areas, including Psychology, Zoology, Genetics and the like, all of whom were involved or becoming involved in the study of aggression. The Bonas meeting outlined several emerging trends in aggression research, the most prominent of which was an increased emphasis on the behavioral aspects of aggression. This included studying a variety of aggressive behaviors rather than single measures; an interest in what might have been previously considered minutiae, such as the targets for bites or blows and the specifics of movement relationships in dyadic interactions; and a desire to relate the dependent variables of laboratory tests to the typical aggressive behaviors seen for related animals in their natural habitats. This increased attention to natural patterns of aggressive behavior was also very interesting in light of the many findings presented at the Bonas meeting which indicated particular involvement of a number of biological systems in aggression: These findings suggested that aggression constitutes an evolved neurobehavioral system (quite possibly more than one, in fact) representing the activities of a relatively specific biological substrate expressed through a patterned system of behaviors. The focus of this book is on teaching pupils to direct their own learning. It deals with formative assessment, that is, assessment designed to inform and enhance pupils' learning. It questions how pupils learn, why they have the curriculum they have, and how they are helped or hindered by their provision. This is a profound and extensive challenge, consistent with an agenda of inclusive education. It indicates that pupils' learning about learning provides a model for professionals' and schools' development. *Advances in the Study of Aggression, Volume 2* is a compendium of papers that discusses application of techniques and programs to human problems of aggression control. Papers evaluate interactive variables and phenomena in aggressive behavior: namely, the behavior of victims and perpetrators; the experience of the aggressive person before and after the aggressive event; pharmacological agents such as alcohol; and limitations on access to social opportunities for these same persons. A significant

commonality of these papers is their recognition of the importance cognitive factors play in the control of aggression. One paper argues that a variety of emotional, physiological, situational, social, and cognitive antecedents regulate the expression of aggressive behavior. Another paper explains that in using punishment techniques, which can effectively control aggression, the inherent problems should be balanced against the benefits to victims, to the aggressor, and to society. One paper reviews studies that have examined the impact of television violence on children, as well as the attitude program designed by Huesmann et al. (1983) to mitigate these effects. The paper points out that though programs designed to mitigate the effects of sexual violence on young adults can be worthwhile, waiting until late adolescence or early adulthood is already waiting too long. The compendium can prove valuable for police administrators, criminologists, counselors, psychologists, lawyers, social workers, and parents of young and adolescent children. During the wars for independence in Spanish South America (1808-1826), thousands of slaves enlisted under the promise of personal freedom and, in some cases, freedom for other family members. Blacks were recruited by opposing sides in these conflicts and their loyalties rested with whomever they believed would emerge victorious. The prospect of freedom was worth risking one's life for, and wars against Spain presented unprecedented opportunities to attain it. Much hedging over the slavery issue continued, however, even after the patriots came to power. The prospect of abolition threatened existing political, economic, and social structures, and the new leaders would not encroach upon what were still considered the property rights of powerful slave owners. The patriots attacked the institution of slavery in their rhetoric, yet maintained the status quo in the new nations. It was not until a generation later that slavery would be declared illegal in all of Spain's former mainland colonies. Through extensive archival research, Blanchard assembles an accessible, comprehensive, and broadly based study to investigate this issue from the perspectives of Royalists, patriots, and slaves. He examines the wartime political, ideological, and social dynamics that led to slave recruitment, and the subsequent repercussions in the immediate postindependence era. Under the Flags of Freedom sheds new light on the vital contribution of slaves to the wars for Latin American independence, which, up until now, has been largely ignored in the histories and collective memories of these nations. The latest addition to the very successful one-minute manager series cuts to the very essence of management. A monkey is a problem to be solved, and the message of the book is "don't take on other peoples' problems"-- Put the monkey back on the shoulders where it belongs. This book analyzes the progress of the MSRI, highlights the political and economic factors affecting its realization, and offers insights into the political and economic implications of China's endeavor. It focuses specifically on countries within Africa and the Middle East to provide a basis for a

substantive examination of these issues in a manner sensitive to the milieu in individual countries and relevant regions. It represents the final volume in a well-received series on China's Maritime Silk Road Initiative (MSRI), which, so far, includes books covering China's MSRI and South Asia (Palgrave, 2018) and China's MSRI and Southeast Asia (Palgrave, 2019). This book will interest scholars of China, international relations, and the relevant regions, journalists, and policymakers. In *Song Dynasty Figures of Longing and Desire*, Lara Blanchard examines the writing of interiority in paintings of women, considering correspondences to examples of erotic poetry and how such works address the concerns of artists, patrons, and viewers. It is organized in the form of a tutorial, covering the important points of the chapter, with learning suggestions along the way. The authors of *Great Leaders Grow* use a fable to lay out what is the secret to great leadership in this internationally bestselling guide. It's a question that everyone in a position of authority—whether in a multinational corporation or a local volunteer group—wonders sooner or later. Here Ken Blanchard, whose books on leadership have sold over twenty million copies, and Mark Miller, who worked his way up from line worker to vice president of Chick-Fil-A, one of the largest fast-food restaurant chains in the country, uncover the secret that great leaders already know and detail what you need to do to truly inspire and motivate others. The authors get at the heart of what makes a leader successful using a classic business fable. Newly promoted but struggling young executive Debbie Brewster asks her mentor, "What is the secret of great leaders?" His reply—"great leaders serve"—flummoxes her, but over time he reveals the five fundamental ways that leaders succeed through service. Along the way, Debbie learns:

- Why great leaders seem preoccupied with the future
- How people on the team ultimately determine your success or failure

What three arenas require continuous improvement • Why true success in leadership has two essential components • How to knowingly strengthen—or unwittingly destroy—leadership credibility This new edition includes a leadership self-assessment so readers can measure to what extent they lead by serving and where they can improve. The authors have also added answers to the most frequently asked questions about how to apply the SERVE model in the real world. As practical as it is uplifting, *The Secret* shares Blanchard and Miller’s wisdom about leadership in a form that anyone can easily understand and implement. “You don’t have to be older to be a great leader. *The Secret* shows how to lay the foundation for powerful servant leadership early in your career to maximize your impact.” —Claire Diaz-Ortiz, Head of Corporate Innovation and Philanthropy at Twitter, Inc. and author of *Twitter for Good and Hope Runs* “When you learn *The Secret*, don’t keep it to yourself. Share it and use it with your people. It will make a difference in their lives and their performance.” —Donald G. Soderquist, former Vice Chairman, Wal-Mart, and founder of the Soderquist Center for Leadership and Ethics, John Brown University “If you know *The Secret*, both relationships and results will prosper. It’s a perfect move in your life from success to significance.” —Bob Buford, author of *Halftime A*

top leadership consultant says: Stop trying to motivate people! Find a powerful alternative to the carrot and stick in this science-driven guide. It’s frustrating for everyone involved and it just doesn’t work. You can’t motivate people—they are already motivated, but generally in superficial and short-term ways. In this book, Susan Fowler builds upon the latest scientific research on the nature of human motivation to lay out a tested model and course of action that will help leaders guide their people toward the kind of motivation that not only increases productivity and engagement but that gives them a profound sense of purpose and fulfillment. Fowler argues that leaders still depend on traditional carrot-and-stick techniques because they haven’t understood their alternatives and don’t know what skills are necessary to apply the new science of motivation. Her *Optimal Motivation* process shows leaders how to move people away from dependence on external rewards and help them discover how their jobs can meet the deeper psychological needs—for autonomy, relatedness, and competence—that science tells us result in

meaningful and sustainable motivation. Optimal Motivation has been proven in organizations all over the world—Fowler’s clients include Microsoft, CVS, NASA, the Catholic Leadership Institute, H&R Block, Mattel, and dozens more. Throughout this book, she illustrates how each step of the process works using real-life examples—and offers a groundbreaking answer for leaders who want to get motivation right! Best-selling author of *The One-Minute Manager*, Ken Blanchard, along with Phil Hodges, reveals the meaning of servant leadership modeled after Jesus Christ. Based on Blanchard’s and Hodges’ Faith Walk seminars, business leaders come to realize that teams are more powerful than the sum of the individuals and to recognize their people as appreciating assets. *Servant Leader* summarizes the Four Dimensions of Leadership: the head (leadership assumptions and methods) the hands (application and leadership behavior) the heart (edging God out) the habits (solitude, prayer, study of scripture, unconditional love, etc.) The thousands who have attended his seminars witnessed the transforming power of this unconventional approach. Readers seeking to grow as leaders and business executives will find *Servant Leader* nothing short of life-changing. rare and wonderful business book that is packed with invaluable information as well as a compelling, page-turning story. Management legend Ken Blanchard and master entrepreneur Sheldon Bowles are back with *Gung Ho!*, revealing a surefire way to boost employee enthusiasm, productivity, and performance and usher in astonishing results for any organization. *Raving Fans* brilliantly schooled managers on how to turn customers into raving fans. *Gung Ho!* now brings the same magic to employees. Here is the story of how two managers saved a failing company and turned in record profits with record productivity. The three core ideas of *Gung Ho!* are surprisingly simple: worthwhile work guided by goals and values; putting workers in control of their production; and cheering one another on. Their principles are so powerful that business leaders, reviewing the manuscript for Ken and Sheldon, have written to say, "Sorry. Ignored instructions. Have photocopied for everyone. I promise to buy books, but can't wait. We need now!" Like *Raving Fans*, *Gung Ho!* delivers. There are few topics in sex research as compelling and confounding to researchers, clinicians, and the general public as that of transsexualism. Upending normative notions of gender, eroticism, and identity, it poses significant scientific and clinical challenges. The book addresses a fascinating and largely unexplored topic within the study of transsexualism: The feelings and desires of conventionally masculine men who are attracted to women yet want to become women themselves. Through a collection and discussion of vivid first-person narratives, the book provides an in-depth examination of these men's unusual propensity to be sexually aroused by the thought of themselves as women and how these men's sexual feelings influence their decisions to seek or undergo sex reassignment. These narratives about autogynephilia by autogynephilic male-to-female (MtF) transsexuals provide the first comprehensive documentation of the erotic ideation that underlies the most common form of MtF transsexualism. The narratives provide empirical evidence for Blanchard's theory of MtF transsexual motivation, and thus are of interest to researchers and theorists studying the phenomenology of MtF transsexualism. The narratives are likely to be eye-opening to psychologists, psychiatrists, physicians, and other professionals who work with MtF transsexuals: Most clinicians probably do not fully appreciate the erotic underpinnings of their clients'

condition. A better understanding of their clients' autogynephilic feelings and motivations would enable these professionals to provide more empathetic and effective clinical care. This Handbook brings together and integrates comprehensively the core approaches to fear and anxiety. Its four sections: Animal models; neural systems; pharmacology; and clinical approaches, provide a range of perspectives that interact to produce new light on these important and sometimes dysfunctional emotions. Fear and anxiety are analyzed as patterns that have evolved on the basis of their adaptive functioning in response to threat. These patterns are stringently selected, providing a close fit with environmental situations and events; they are highly conservative across mammalian species, producing important similarities, along with some systematic differences, in their human expression in comparison to that of nonhuman mammals. These patterns are described, with attention to both adaptive and maladaptive components, and related to new understanding of neuroanatomic, neurotransmitter, and genetic mechanisms. Although chapters in the volume acknowledge important differences in views of fear and anxiety stemming from animal vs. human research, the emphasis of the volume is on a search for an integrated view that will facilitate the use of animal models of anxiety to predict drug response in people; on new technologies that will enable direct evaluation of biological mechanisms in anxiety disorders; and on strengthening the analysis of anxiety disorders as biological phenomena.

- Integrates animal and human research on fear and anxiety
- Presents emerging and developing fields of human anxiety research including imaging of anxiety disorders, the genetics of anxiety, the pharmacology of anxiolysis, recent developments in classification of anxiety disorders, linking these to animal work
- Covers basic research on innate and conditioned responses to threat
- Presents work from the major laboratories, on fear learning and extinction
- Reviews research on an array of neurotransmitter and neuromodulator systems related to fear and anxiety
- Compares models, and neural systems for learned versus unlearned responses to threat
- Relates the findings to the study, diagnostics, and treatment of anxiety disorders, the major source of mental illness in modern society (26 % of Americans are affected by anxiety disorders!)
