Also included in the Field Guide are easy-to-understand directions on how to gather and store data in the field in preparation for future analysis. The Guide uses colors and diagrams making it easy to read and understand which could be the difference between successfully gathering data and blowing it when under the pressure of dealing with the real thing out in the field. Sections in the Sasquatch Field Guide include information on visual identification, footprint identification, track casting, gathering footprint metrics, hair samples, scat samples, tree breaks, nests, cultural signs, stacked rocks, habitat and distribution, diet, vocalizations, possible origins, and taphonomy.
