An illustrated, abridged, version of Toynbee's twelve-volume work on the process of history This collection of essays begins with the premise that violence, in its relationship to order, is a central element of history. Taking a broad definition of violence, including structural and symbolic violence, the contributions move beyond the problematic of civilization's mitigating or foundational role, instead seeing violence as inherently social, and, perhaps, socially inherent (if variable). The question then becomes what forms of harm are authorized or banned in which social orders and how they change over time. Beginning with a theoretical introduction, this interdisciplinary volume includes seven papers representing cultural anthropology, history,

archaeology and international relations. The papers range from China to the Americas and from the 2nd millennium BCE to the 21st century CE. Some deal with long-term developments while others focus on a single time and place. Many treat the issue of the visibility/invisibility of violence, while all in one way or another deal with the role of violence in the reproduction of community. Together, the volume aims to paint, with a few strokes, the outlines of a deep historical anthropology of social violence. The volume is based on the proceedings of a symposium hosted at Brown University. A comprehensive account of how energy has shaped society throughout history, from pre-agricultural foraging societies through today's fossil fuel-driven civilization. "I wait for new Smil books the way some people wait for the next 'Star Wars' movie. In his latest book, *Energy and Civilization: A History*, he goes deep and broad to explain how innovations in humans' ability to turn energy into heat, light, and motion have been a driving force behind our cultural and economic progress over the past 10,000 years. —Bill Gates, *Gates Notes, Best Books of the Year* Energy is the only universal currency; it is necessary for getting anything done. The conversion of energy on Earth ranges from terra-forming forces of plate tectonics to cumulative erosive effects of raindrops. Life on Earth depends on the photosynthetic conversion of solar energy into plant biomass. Humans have come to rely on many more energy flows—ranging from fossil fuels to photovoltaic generation of

*electricity—for their civilized existence. In this monumental history, Vaclav Smil provides a comprehensive account of how energy has shaped society, from pre-agricultural foraging societies through today's fossil fuel-driven civilization. Humans are the only species that can systematically harness energies outside their bodies, using the power of their intellect and an enormous variety of artifacts—from the simplest tools to internal combustion engines and nuclear reactors. The epochal transition to fossil fuels affected everything: agriculture, industry, transportation, weapons, communication, economics, urbanization, quality of life, politics, and the environment. Smil describes humanity's energy eras in panoramic and interdisciplinary fashion, offering readers a magisterial overview. This book is an extensively updated and expanded version of Smil's *Energy in World History* (1994). Smil has incorporated an enormous amount of new material, reflecting the dramatic developments in energy studies over the last two decades and his own research over that time. The History Compendium for General Studies CSAT Paper 1, State PCS, CDS, & NDA 2nd Edition has been thoroughly revised & updated to provide the MOST UPDATED material for the exam. The USP of the book is that the information is captured in a concise and easy to remember methodology which further comprises of Mind Maps, Infographics, Charts, Tables and latest exam pattern MCQs. The emphasis of the book has been on conceptual understanding and*

*better retention which are important from the point of view of the exam. The book captures most of the important questions with explanations of the past years of the IAS Prelim exam, CDS, NDA and other competitive exams distributed in the various chapters. The book is divided into 18 chapters. Each chapter is followed by 2 levels of exercises with 1350+ Simple MCQs & statement based MCQs. The year is 2393, and the world is almost unrecognizable. Clear warnings of climate catastrophe went ignored for decades, leading to soaring temperatures, rising sea levels, widespread drought and—finally—the disaster now known as the Great Collapse of 2093, when the disintegration of the West Antarctica Ice Sheet led to mass migration and a complete reshuffling of the global order. Writing from the Second People's Republic of China on the 300th anniversary of the Great Collapse, a senior scholar presents a gripping and deeply disturbing account of how the children of the Enlightenment—the political and economic elites of the so-called advanced industrial societies—failed to act, and so brought about the collapse of Western civilization. In this haunting, provocative work of science-based fiction, Naomi Oreskes and Eric M. Conway imagine a world devastated by climate change. Dramatizing the science in ways traditional nonfiction cannot, the book reasserts the importance of scientists and the work they do and reveals the self-serving interests of the so called "carbon combustion complex" that have turned the practice of science into political*

fodder. Based on sound scholarship and yet unafraid to speak boldly, this book provides a welcome moment of clarity amid the cacophony of climate change literature.

*DAILY TELEGRAPH BOOKS OF THE YEAR* If in the year 1411 you had been able to circumnavigate the globe, you would have been most impressed by the dazzling civilizations of the Orient. The Forbidden City was under construction in Ming Beijing; in the Near East, the Ottomans were closing in on Constantinople. By contrast, England would have struck you as a miserable backwater ravaged by plague, bad sanitation and incessant war. The other quarrelsome kingdoms of Western Europe - Aragon, Castile, France, Portugal and Scotland - would have seemed little better. As for fifteenth-century North America, it was an anarchic wilderness compared with the realms of the Aztecs and Incas. The idea that the West would come to dominate the Rest for most of the next half millennium would have struck you as wildly fanciful. And yet it happened. What was it about the civilization of Western Europe that allowed it to trump the outwardly superior empires of the Orient? The answer, Niall Ferguson argues, was that the West developed six "killer applications" that the Rest lacked: competition, science, democracy, medicine, consumerism and the work ethic. The key question today is whether or not the West has lost its monopoly on these six things. If so, Ferguson warns, we may be living through the end of Western ascendancy. Civilization takes readers on their own extraordinary journey around the world - from the

*Grand Canal at Nanjing to the Topkapi Palace in Istanbul; from Machu Picchu in the Andes to Shark Island, Namibia; from the proud towers of Prague to the secret churches of Wenzhou. It is the story of sailboats, missiles, land deeds, vaccines, blue jeans and Chinese Bibles. It is the defining narrative of modern world history. REA ... Real review, Real practice, Real results. The Globalization of International Society re-examines the development of today's society of sovereign states, drawing on a wealth of new scholarship to challenge the landmark account presented in Bull and Watson's classic work, *The Expansion of International Society* (OUP, 1984). For Bull and Watson, international society originated in Europe, and expanded as successive waves of new states were integrated into a rule-governed order. International society, on their view, was thus a European cultural artefact - a claim that is at odds with recent scholarship in history, politics, and related fields

of research. Bringing together leading scholars from Asia, Australia, Europe, and the United States, this book provides an alternative account: it draws out the diversity of polities that existed at around c1500; it shows how interacting identities, political orders, and economic forces were intensifying within and across regions; it details the tangled dynamics that helped to globalize the European conception of a pluralist international society, through patterns of warfare and between East and West. *The Globalization of International Society* examines the institutional contours of contemporary international society, with its unique blend of universal sovereignty and global law, and its forms of hierarchy that coexist with commitments to international human rights. The book explores the multiple forms of contestation that challenge international society today: contests over the limits of sovereignty in relation to cosmopolitan conceptions of responsibility, disputes over global governance, concerns about persistent economic, racial, and gender-based patterns of disadvantage, and lastly the threat to the established order opened up by the disruptive power of digital communications. The thoroughly Revised & Updated 3rd Edition of the book *History Compendium for General Studies CSAT Paper 1 & State PCS* provides the MOST UPDATED material for the exam. The USP of the book is that the information is captured in a self-explanatory and easy to remember methodology which comprises of Mind Maps, Infographics, Charts, Tables and latest exam pattern

MCQs. The emphasis of the book has been on capturing each and every detail pertaining to the Indian History which is important from the point of view of the exam. The book captures most of the important questions with explanations of the past years of the IAS Prelim exam, CDS, NDA and other competitive exams distributed in the various chapters. The book is divided into 3 parts (Ancient, Medieval & Modern) which are further divided into 32 chapters. Each chapter is followed by 2 levels of exercises with 1500+ Simple MCQs & statement based MCQs.

**WESTERN CIVILIZATION: BEYOND BOUNDARIES**, Seventh Edition, is distinguished for its wider definition of Europe that includes Eastern Europe, Scandinavia, and European frontiers. REA's CLEP test preps are perfect for adults returning to college (or attending for the first time), military service members, high-school graduates looking to earn college credit, or home-schooled students with*

knowledge that translates into college credit. /REA's comprehensive review covers all the topics found on the official CLEP Western Civilization I exam: ancient Greece and Rome, the middle ages, the renaissance, and early modern Europe. /Students start their study by taking our diagnostic practice test online. This timed test includes automatic scoring and diagnostic feedback to help students pinpoint their strengths and weaknesses. The book includes 2 practice tests that mirror the actual exam. Each practice test comes with detailed answers, to help students identify areas in need of improvement. /The book's practice tests are offered online in a timed format with instant scoring, diagnostic feedback, and detailed explanations of answers This study revisits one of the most extensive examples of the spread of ideas in the history of civilization: the diffusion of Indian religious and political ideas to Southeast Asia before the advent of Islam and European colonialism. Hindu and Buddhist concepts and symbols of kingship and statecraft helped to legitimize Southeast Asian rulers, and transform the political institutions and authority of Southeast Asia. But the process of this diffusion was not accompanied by imperialism, political hegemony, or "colonization" as conventionally understood. This book investigates different explanations of the spread of Indian ideas offered by scholars, including why and how it occurred and what were its key political and institutional outcomes. It challenges the view that strategic competition is a recurring phenomenon when civilizations

*encounter each other. An encyclopedic study on the role that fear and anxiety have played as the organizing motives of human existence and social life. Hankiss explains how human beings have surrounded themselves with protective symbols: myths and religions, values and belief systems, ideas and scientific theories, moral and practical rules of behaviour, and a wide range of everyday rituals and trivialities.*
