**International Criminal Law Practitioner Library: Volume 2, Elements of Crimes under International Law** Nov 16 2022 Volume II of the International Criminal Law Practitioner Library series focuses on the core categories of international crimes: crimes against humanity, genocide, and war crimes. The authors present a comprehensive and critical review of the law on the elements of these crimes and their underlying offences, and examine how they interact with the forms of responsibility discussed in Volume I. They also consider the effect of the focus in early ICTY and ICTR proceedings on relatively low-level accused for the development of legal definitions that are sometimes ill-suited for leadership cases, where the accused had little or no physical involvement in the crimes. The book's main focus is the jurisprudence of the ad hoc Tribunals, but the approaches of the ICC and the various hybrid tribunals are also given significant attention. The relevant jurisprudence up to 1 December 2007 has been surveyed, making this a highly useful and timely work.

**EU Procedural Law** Nov 11 2019 The European Union is unique amongst international organisations in that it has a highly developed and coherent system of judicial protection. The rights derived from Union law can be enforced in court, as opposed to other international organisations whereby enforceability is often far less certain. At the heart of the system of judicial protection in the European Union is the core principle of upholding the rule of law. As such, the stakes are high in the sense that the system of the judicial protection in the European Union must live up to its promise in which individuals, Member States and Union institutions are all guaranteed a route by which to enforce Union law rights. This book provides a rigorously structured analysis of the EU system of judicial protection and procedure before the Union courts. It examines the role and the competences of the Union courts and the types of actions that may be brought before them, such as the actions for infringement, annulment, and failure to act, as well as special forms of procedure, for example interim relief, appeals, and staff cases. In doing so, special attention is given to the fields of EU competition law and State aid. In addition it evaluates the relationship between the Court of Justice and the national courts through the preliminary ruling procedure and the interplay between EU law and the national procedural frameworks generally. Throughout, it takes account of significant institutional developments, including the relevant changes brought by the entry into force of the Lisbon Treaty and the amendments to the Statute of the Court of Justice of the European Union and the Rules of Procedure of the Court of Justice and the General Court. Previously published as *The Procedural Law of the European Union*, this thoroughly revised work will continue to be the first port of call for legal practitioners and academics seeking guidance on the system of judicial protection in the EU.

*The Heart of Community Engagement* Oct 23 2020 Drawing on first-hand accounts of action research in the Americas, Africa, and Asia, *The Heart of Community Engagement* illustrates the transformative learning journeys of exemplary catalysts for community-based change. Practitioners' stories of community engagement for social justice in the Global South elucidate the moments of insight and transformation that deepened their practice: how to deal with uncertainty, recognize their own blind spots, become aware of what is emergent and possible in the moment, and weave an inclusive bond of love, respect, and purpose. Each successive narrative adds a deeper level of understanding of the inner practice of community engagement. The stories illuminate the reflective, or inner, practice of the outside change agent, whether a planner, designer, participatory action researcher, or community development practitioner. From a shantytown in South Africa, to a rural community in India, or an informal settlement in peri-urban Mexico, the stories focus attention on the greatest leverage point for change that we, as engaged practitioners, have: our own self-awareness. By the end of the book, the practitioners are not only aware of their own conditioned beliefs and assumptions, but have opened their minds and hearts to the complex and dynamic patterns of emergent change that is possible. This book serves as a much-needed reader of practice stories to help instructors and students find the words, concepts, and examples to talk about their own subjective experience of community engagement practice. The book applies some of the leading-edge concepts from organizational development and leadership studies to the fields of planning, design, and community engagement practice. Key concepts include the deep dive of sensing the social field, seeing the whole, and presenting the emergent future. The book also provides a creative bridge between participatory action research and design thinking: user-based design, rapid prototyping, and learning from doing.

*The Functions of Arbitral Institutions* Sep 21 2020 While thousands of cross-border disputes are successfully resolved each year through institutional arbitration, there appears to be little understanding of the functions exercised by arbitral institutions and their impact on the proceedings they administer. Much like the user of a computer may operate, with relative success, a machine which he does not fully comprehend, users of institutional arbitration have for many decades resolved their disputes successfully through institutional arbitration without fully understanding the precise nature of the functions of what is a key player in the process. This book rectifies this paradoxical gap. It offers a clear yet nuanced overview of the diverse and complex reality of institutional arbitration, while challenging the assumptions conventionally held as to the role of arbitral institutions. This book is the product of a systematic study of the activities performed by over forty leading international arbitration institutions worldwide in their administration of cases (including the ICC, LCIA, ICDR, SCC, SIAC, HKIAC, JAMS, CIETAC, KLRCA, DIS, DIA, NAI, CEPANI etc.). This book also examines a wealth of court decisions and bibliographical sources from the leading civil law and common law jurisdictions (e.g., France, England & Wales, the United States, Switzerland, Germany). This book is invaluable to academics and practitioners interested in furthering their theoretical and practical understanding of institutional arbitration and arbitral institutions.

*The Devil's Advocates* Apr 09 2022 From the authors of the acclaimed *Ladies and Gentlemen of the Jury*, and featuring some of the most important cases in criminal law, *The Devil's Advocates* is the final volume of a must-have trilogy of the best closing arguments in American legal history. Criminal law is considered by many to be the most exciting of the legal specialties, and here the authors turn to the type of dramatic crimes and trials that have so captivated the public -- becoming fodder for countless television shows and legal thrillers. But the eight cases in this collection have also set historical precedents and illuminated underlying principles of the American criminal justice system. Future president John Adams makes clear that even the most despised and vilified criminal is entitled to a legal defense in the argument he delivers on behalf of the British soldiers who shot and killed five Americans during the Boston Massacre. The always-controversial temporary-insanity defense makes its debut within sight of the White House when, in front of horrified onlookers, a prominent congressman guns down the district attorney over an extramarital affair. Clarence Darrow provides a ringing defense of a black family charged with using deadly force to defend themselves from a violent mob -- an argument that refines the concept of self-defense and its applicability to all races. The treason trial of Aaron Burr, accused of plotting to "steal" the western territories of the United States and form a new country with himself as its head, offers a fascinating glimpse into a rare type of prosecution, as well as a look at one of the most interesting traitors in the nation's history. Perhaps the best-known case in the book is that of Ernesto Miranda, the accused rapist whose trial led to the Supreme Court decision requiring police to advise suspects of their rights to remain silent and to have an attorney present -- their Miranda rights. Each of the eight cases presented here is given legal and cultural context, including a brief historical introduction, a biographical sketch of the attorneys involved, highlights of trial testimony, analysis of the closing arguments, and a summary of the trial's impact on its participants and our country. In clear, jargon-free prose, Michael S Lief and H. Mitchell Caldwell make these pivotal cases come to vibrant life for every reader.

*The Volatility Surface* Nov 04 2021 Praise for The Volatility Surface "I'm thrilled by the appearance of Jim Gatheral's new book The Volatility Surface. The literature on stochastic volatility is vast, but difficult to penetrate and use. Gatheral's book, by contrast, is accessible and practical. It successfully charts a middle ground between specific examples and general models--achieving remarkable clarity without giving up sophistication, depth, or breadth." --Robert V. Kohn, Professor of Mathematics and Chair, Mathematical Finance Committee, Courant Institute of Mathematical Sciences, New York University "Concise yet comprehensive, equally attentive to both theory and phenomena, this book provides an unsurpassed account of the peculiarities of the implied volatility surface, its consequences for pricing and hedging, and the theories that struggle to explain it." --Emanuel Derman, author of My Life as a Quant "Jim Gatheral is the wiliest practitioner in the business. This very fine book is an outgrowth of the lecture notes prepared for one of the most popular classes at NYU's esteemed Courant Institute. The topics covered are at the forefront of research in mathematical finance and the author's treatment of them is simply the best available in this form." --Peter Carr, PhD, head of Quantitative Financial Research, Bloomberg LP Director of the Masters Program in Mathematical Finance, New York University "Jim Gatheral is an acknowledged master of advanced modeling for derivatives. In The Volatility Surface he reveals the secrets of dealing with the most important but most elusive of financial quantities, volatility." --Paul Wilmott, author and mathematician "As a teacher in the field of mathematical finance, I welcome Jim Gatheral's book as a significant development. Written by a Wall Street practitioner with extensive market and teaching experience, The Volatility Surface gives students access to a level of knowledge on derivatives which was not previously available. **International Handbook of Penology and Criminal Justice** Feb 07 2022 At the outset of the twenty-first century, more than 9 million people are held in custody in over 200 countries around the world. --from the essay "Prisons and Jails" by Ron King The first comparative study of this increasingly integral social subject, International Handbook of Penology and Criminal Justice provides a comprehensive and balanced review of the philosophy and practicality of punishment. Drawn from the expertise of scholars and researchers from around the world, this book covers the theory, practice, history, and empirical evidence surrounding crime prevention, identification, retribution, and incarceration. It analyzes the efficacy of both traditional methods and thinking as well as novel concepts and approaches. Beginning with a study of the changing attitude of penal practice in Florida from one of offender transformation to one of risk-management, imprisonment, surveillance, and control, this volume embarks on an objective and sober appraisal of every aspect of the field. Contributions consider the sociology of incarcerated prisoners including the increasing prevalence of prison suicides. The book evaluates arguments regarding the world-wide abolition of capitol punishment from moral, utilitarian, and practical positions. It examines non-incarcerative and alternative punishments such as financial restoration and restrictions of liberty, as well as the positive effects of Victim Offender Mediation. It also considers several methods aimed at achieving measurable crime prevention including identifying at-risk juveniles and minimizing crimes of opportunity, as well as the pros and cons of employing the coercive power of police. Further essays consider subjects such as international policing, the roles of prosecution and defense attorneys, current discretionary sentencing practices, and the role and treatment of victims. The volume concludes with two chapters of case studies that provide a "hands-on" feel for the interplay of the concepts discussed. This volume is the first in a three-part trilogy.
